OVERVIEW

About Course5 Intelligence – www.course5i.com

Course5 Intelligence enables organizations to make the most effective strategic and tactical moves relating to their customers, markets, and competition at the rapid pace that the digital business world demands. We do this by driving digital transformation through analytics, insights, and Artificial Intelligence (AI). Our clients experience higher top line and bottom line results with improved customer satisfaction and business agility. As we solve today's problems for our clients, we also enable them to reshape their businesses to meet and actualize the future.

Rapid advances in Artificial Intelligence and Machine Learning technology have enabled us to create disruptive technologies and accelerators under our Course5 Intelligence suites that combine analytics, digital, and research solutions to provide significant and long-term value to our clients.

Course5 Intelligence creates value for businesses through synthesis of a variety of data and information sources in a 360-degree approach, solution toolkits and frameworks for specific business questions, deep industry and domain expertise, Digital Suite and Research AI to accelerate solutions, application of state-of-the-art AI and next-generation technologies for cognitive automation and enhanced knowledge discovery, and a focus on actionable insight.

POSITION SUMMARY

The role of an analyst a critical element to any project. You will be supporting assistant managers and upwards. The fundamental tool of any well executed project is good quality data. The analyst plays a crucial role in making sure that high quality data is delivered from him/her to their team for the project.

ROLES AND RESPONSIBILITIES

- Participate by listening into client calls or other project briefings to understand the objective of the project
- Collect, track and report day-to-day market driven events pertaining to the project
- Exposure to secondary and syndicated pharmaceutical databases, exposure or understanding of regulatory or clinical data
- Potentially progress into more advanced project work, content generation, or other content responsibilities

REQUIRED KNOWLEDGE AND SKILLS

- 2+ years of experience in pharmaceutical competitive intelligence
- Impeccable attention to detail and accuracy
- Good organizational, time management and priority setting skills, and the flexibility to multi-task in a fast-

paced environment

- Ability to think critically, work independently and follow instructions
- Ability to work collaboratively within a team both in the office and off site
- Working knowledge of Microsoft Excel, Word and PowerPoint
- Excellent written and verbal English skills
