This position is for a product QA engineer for Course5's Digital Suite team. The candidate will be part of Digital Suite's product development team responsible for the test plan creation, writing Test Cases, Automation of the test case execution of our product suite.

We are looking for dynamic, driven and smart individuals who are not afraid to experiment and fail, are able to work in a fast paced environment, and deliver robust, scalable products within committed timelines.

### SPECIFIC RESPONSIBILITIES

- Strong software testing skills and SDLC/STLC fundamentals with scenario based testing ability.
- Ability to understand the Project requirement and articulate testing strategy and test cases.
- Strong skill for automated testing with automated frameworks.
- Experience in writing Test plan and Hands on Software testing with large and scalable consumer driven technology products.
- Team handling and mentoring skills with good communication (written and verbal).
- Should be able to work on project having different technology or adoptive enough to work on new technologies based projects
- Should be able to participate in requirement gathering and project planning activities.
- Work with the development team to coordinate releases to production environment
- Focus on Non-functional aspects such as Performance, Scalability, Security etc.
- Good multitasking ability with sense of prioritization.
- Should be able to write Unit, System and Integration test cases for the project/assignment.

### REQUIRED KNOWLEDGE, SKILLS AND ABILITIES

- Bachelor's degree in Engineering or equivalent; Master's degree added advantage.
- 4 to 5 Year of experience leading QA and SW testing of products with team.
- Excellent coding skills and knowledge of automation tools  
Experience with hands on Testing (in all aspects of QA) and independent ownership of overall software QA.
- Ability to translate business requirements into test plans and test cases
- Experience with Selenium, QTP, MySQL, MS Excel, VBA, JIRA (or equivalent Defect management tool).

- Strong knowledge of web application Testing developed in language/frameworks like PHP, HTML, Laravel, Drupal, Java Script, Jason, Ajax.
- Knowledge of databases/ backend like MySQL, MongoDB
- Experience with cloud environments such as AWS, Google Cloud or Azure is a plus.  
Should be able to test Web Service, APIs used in project.
