At Blueocean we consider the role of an analyst a critical element to any project. You will be supporting assistant managers and upwards. The fundamental tool of any well executed project is good quality data. The analyst plays a crucial role in making sure that high quality data is delivered from him/her to their team for the project.

## ROLES AND RESPONSIBILITIES

- Participate by listening into client calls or other project briefings to understand the objective of the project
- Collect, track and report day-to-day market driven events pertaining to the project
- Exposure to secondary and syndicated pharmaceutical databases, exposure or understanding of regulatory or clinical data
- Potentially progress into more advanced project work, content generation, or other content responsibilities

## REQUIRED KNOWLEDGE AND SKILLS

- 2+ years of experience in pharmaceutical competitive intelligence
- Impeccable attention to detail and accuracy
- Good organizational, time management and priority setting skills, and the flexibility to multi-task in a fast-paced environment
- Ability to think critically, work independently and follow instructions
- Ability to work collaboratively within a team both in the office and off site
- Working knowledge of Microsoft Excel, Word and PowerPoint
- Excellent written and verbal English skills
