OVERVIEW

Course5 Intelligence

We enable organizations to make the most effective strategic and tactical moves relating to their customers, markets, and competition at the rapid pace that the digital business world demands. Founded in 2000, our business areas include Market Intelligence, Big Data Analytics, Digital Transformation, Artificial Intelligence, and Analytics. Rapid advances in Artificial Intelligence and Machine Learning technology have enabled us to create disruptive technologies and accelerators under our Course5 Intelligence suites that combine analytics, digital, and research solutions to provide significant and long-term value to our clients. More information can be found at www.course5i.com

Global Offices

United States | United Kingdom | United Arab of Emirates | India | Singapore

Job Responsibilities:

- Develop rich, interactive data visualizations to facilitate data navigation and uncover insights. The visualizations will include elements such as interactive search, sortable tables, graphs, charts, maps, and other dynamic features.
- Update existing visualizations to improve layout, load time, and add features.
- Present design mockups and refine them as per feedback from stakeholders.
- Rapidly design, prototype, and iterate on creative concepts to meet the stakeholder's requirements.
- Proven experience visualizing raw, transformed, and modeled data via different platforms such as Power BI for business partner consumption; proven experience in developing complex dashboards with heavy data volumes.
- Experience with data modeling, Advance SQL techniques and data warehousing (Good to have: understanding ETL)
- Understand database design principles including normalization and aggregation for online and data warehouse schemas to support the needs of application developers.
- Maintain developed source code in the repository for all databases and keep all build programs up to date.

- Be responsible for overall development success (inclusive of peer/code reviews, adherence to corporate standards, build process guidelines, maintainability, unit tests) of the project.
- Ability to ideate requirements and design iteratively with business partners without formal requirements documentation
- Ability to estimate project deliverables
- Analytical skills with the ability to produce actionable insights from information gathered
- Analyze data from multiple internal and external sources to build clear insights and identify specific areas of competitive advantage / disadvantage
- Ability to reconcile large, disparate and conflicting datasets to draw out appropriate insights
- Good communications and presentation skills—ability to write and speak effectively to audiences with varied technical depth and diverse professional roles

Requirements & Qualifications:

- Experience in Advance Excel knowledge is a must [Advance formula, data summarization, Visualization – Chart / Excel Dashboard].
- A minimum of 5-6 year's work experience as a SQL Developer, Visualization Lead and Power BI Tool knowledge, preferred with Domain experience with Retail or FMCG projects or Healthcare.
- Experience with SQL / MY SQL & Database [4 to 5 Years]
- 4+ years' experience in Power BI.
- Experience with data visualization libraries /framework like D3JS, Highcharts, ChartJS etc. (Good to Have)
- Good to have knowledge:
- ETL Tool, Python / VBA / Any automation platform.
- Experience UI / Visualization lead with end-to-end implementation of Dashboard / Applications.
