

## **Job Description**

<b>Company</b>	Course5 Intelligence
<b>Position Title</b>	Senior Data Scientist
<b>Reporting to</b>	AVP – Supply Chain Analytics
<b>Schedule</b>	Full-Time
<b>Work Location</b>	Bangalore / Mumbai

### **OVERVIEW**

#### **Course5 Intelligence**

We enable organizations to make the most effective strategic and tactical moves relating to their customers, markets, and competition at the rapid pace that the digital business world demands. Founded in 2000, our business areas include Market Intelligence, Big Data Analytics, Digital Transformation, Artificial Intelligence, and Analytics. Rapid advances in Artificial Intelligence and Machine Learning technology have enabled us to create disruptive technologies and accelerators under our Course5 Intelligence suites that combine analytics, digital, and research solutions to provide significant and long-term value to our clients. More information can be found at [www.course5i.com](http://www.course5i.com)

#### **Global Offices**

United States | United Kingdom | United Arab of Emirates | India | Singapore

#### **Job Summary:**

To develop, own & execute Analytics related projects for our client. To be achieved through proper understanding of the client's problem statement and accordingly delivering appropriate analytics solution in line with the client anticipated outcome.

#### **Job Responsibilities:**

1. Own and execute retail analytics related projects.
2. Independently interact with internal / external clients to understand requirements and provide updates for Proposal or Execution, as the case may be.
3. Define an analytics plan and delivery schedule.
4. Deliver outputs and communicate project progress to relevant stakeholders.
5. Develop comprehensive models / codes for specific use cases (like segmentation, forecasting, key driver analysis, price elasticity) in Supply Chain domain that can be used in a productized form with 'no requirement of manual intervention' once they are developed. You are expected to work hands-on.
6. Ensure end-to-end implementation of the developed modules on the products.
7. Develop and distribute product strategies for analytics related interventions.

## **Requirements & Qualifications:**

### **Preferred Academic Qualification:**

MSc Statistics or Engineering, Computer Science, Operations Research, Mathematics.

### **Years of Experience:**

Preferred 5+ Years

### **Knowledge / Competency / Skills:**

1. Understand clients' business questions and develop solution architecture.
2. Make sure that all project deliverables are completed on schedule and in accordance with clients' needs and expectations.
3. Lead client engagements and assignments to ensure appropriate staffing, resource utilization, and quality assurance.
4. Capability Development: Work with the team to help build cutting-edge solutions. Provide guidance to junior analysts for solving problems, developing analytical strategies, and helping them apply analytical techniques and frameworks.
5. Ensure that all deliverables meet client expectations and all compliance and regulatory requirements.
6. Identify risks in engagements and develop the mitigation plan.
7. Work with the teams to identify and execute productivity opportunities
8. Hands-on work experience with large-scale implementations of GCP, AWS, or Azure
9. Experience with analytics tool kits, such as Google Analytics, Adobe, Omniture, Excel, R, Python etc.
